Approval Application

essentials

The Approval Application provides approval requests for all property processes.

Manage all company approvals in one application which includes history and digital signatures.

The focus is on acquisition and investment approvals.

The decision process depends on

- responsibility
- employee hierarchy
- centrally managed approval limits

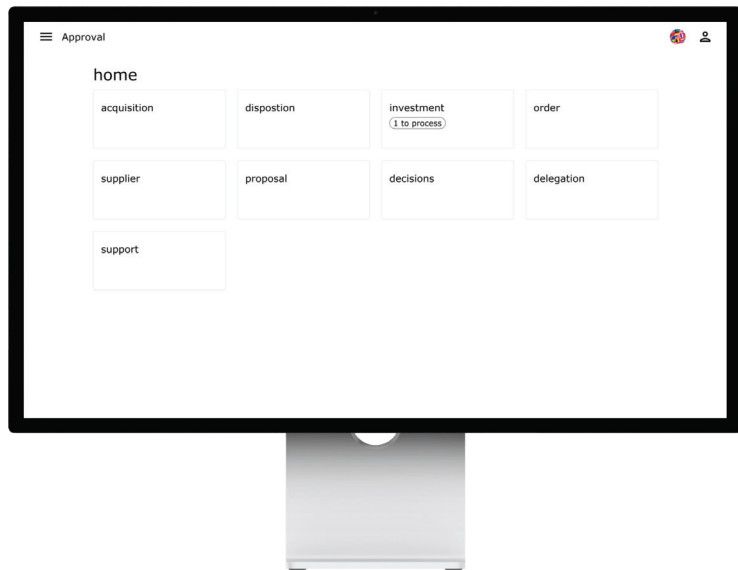

Approval requests are for individual persons or a specific group, like a committee, who can vote.

The application offers

- one platform to make approval decisions
- integration to all applications
- follow up of approval decisions over time

functions

Receive the approval requests via the management dashboard.

Get an email message for each process step

- new approval request
- finalized approval request
- upcoming due date

Make the decision in the approval detail view.

The request document and key indicators are available.

The approval request history is available in the decision view.
