Education Application

Akelius

essentials

The Education Application is where staff can access a set of courses according to their company's role.

Courses consist of education material and tests.

A course is completed with a test on the content of the course material.
The Education Application tracks the results.

Provide a visual growth path in the application.

The Education Application offers
- a user friendly interface
- creation of tests, books, and other learning material
- contents for real estate education

functions

courses

Manage courses through the application.

Courses contain tests and learning materials,
such as videos and eBooks.

progress and test results

On individual level, staff can complete their tests and
track their own progress.

Reach at least eighty percent of correct answers to
successfully complete each test.
