

letting and marketing

# Letting Application

## *essentials*

The Letting Application allows for a digital way to advertise apartments on several platforms with one click.

Collect all inquiries from prospect in the Letting Application.

Arrange viewings to start the screening process.

The Letting Application manages the letting process from a vacant unit until the unit is rented out.

Increase advertisement reach and reduce time spent on administrative tasks.

Improve service with more transparent and faster communication.

Shorten the vacancy time.

The application reduces the letting management time with fifty percent

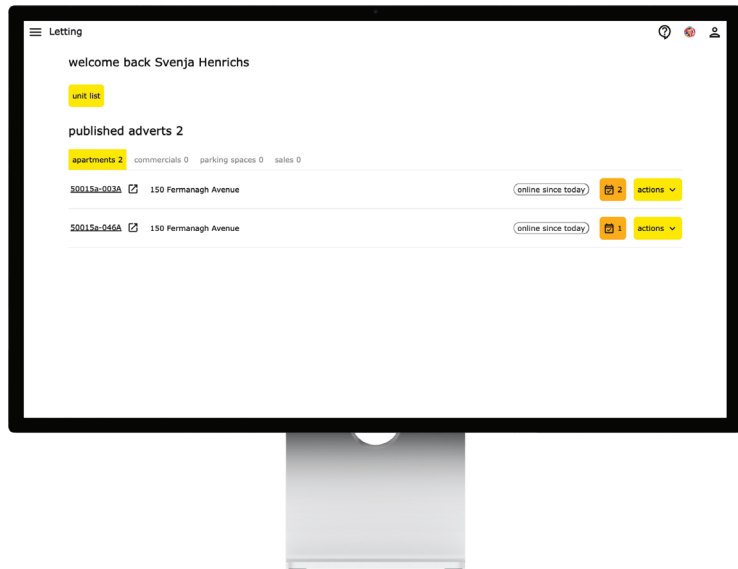

- publish ads to one or many listing sites in less than five minutes
- manage adverts, prospects, tours, and applicants in an all-in one leasing solution
- use customized interfaces for desktop and mobile devices

# functions

The Letting Application is a tool to market units and to find a new tenant.

The Letting Application has a personalize dashboard, from where the letting manager can manage their administration.

The letting manager can use the Letting Application on their mobile or tablet, which reduces time spent in the office.

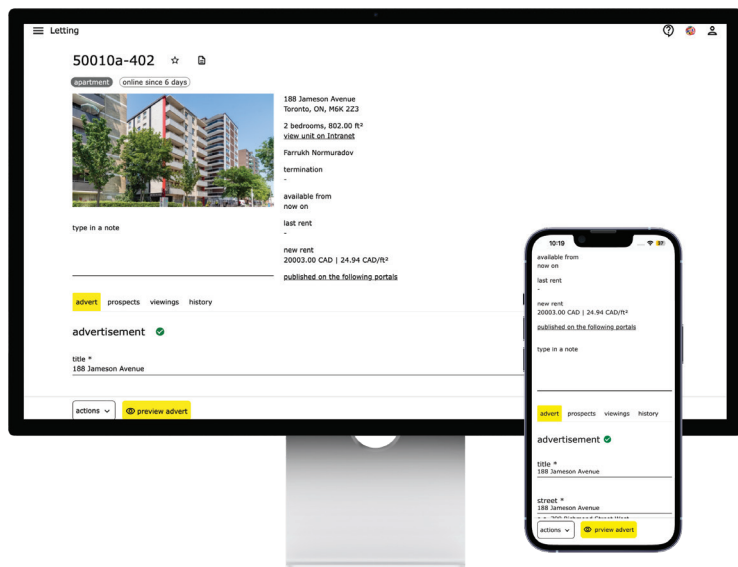

## create and publish an advertisement

Create a new advertisement by

- updating key facts
- uploading images
- adding a virtual tour

The Letting Application publishes advertisements automatically to your website and external listing sites.

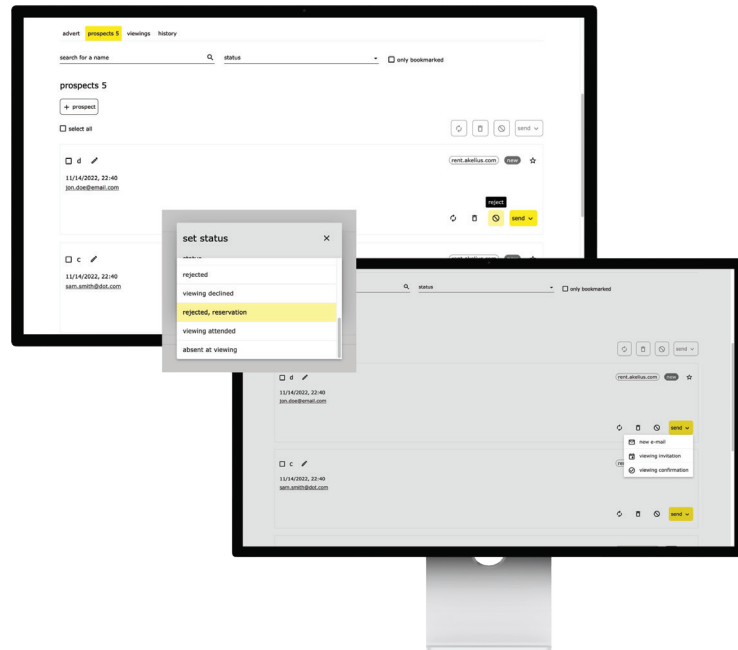

## communication with prospects

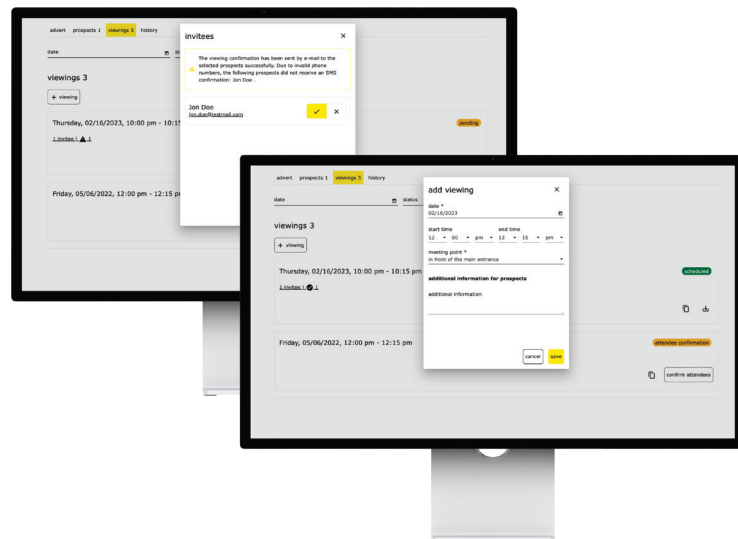

Manage your prospects with the Letting Application.

When there are new inquiries you can plan and send

- viewing invitations
- rejections
- reservations

You can invite one or multiple prospective tenants to a viewing.

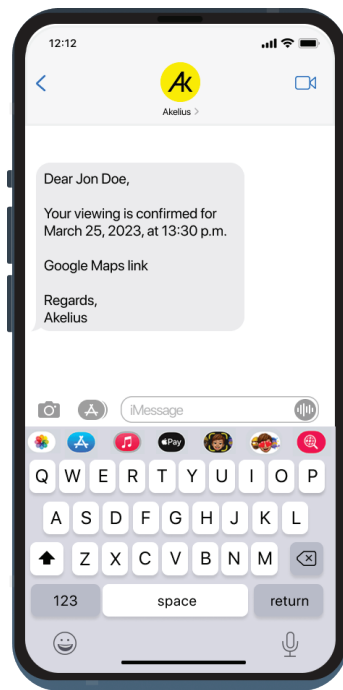

The Letting Application sends out the viewing invitation automatically.

Customize messages to your company's layout and send the message in multiple languages.

The prospective tenant can accept or decline the invite with one click.

The viewing is confirmed and the prospective tenant receives confirmation.

The Letting Application shows attendees to you.

The application sends a reminder by SMS or email prior to the viewing.
